The FULFILLMENT and WAREHOUSE service is addressed to online businesses that want to improve the logistic flow and expand their sales to all European countries. It provides a complete service for receiving orders, processing, correcting orders, preparing for delivery and handing over to the courier service, thus making your business logistics more efficient. By outsourcing the fulfillment service, you reduce the logistics costs of your online business in several ways, allowing a greater focus to sales and development. Fulfillment Service aims to optimize the costs and logistic operations of small online businesses. Thus, our company will take care of taking orders, packing them, preparing them for delivery as well as managing returns for a new delivery.

The service refers to storage, pick, pack and delivery preparation for general goods that do not require special authorizations ( like food, chemical, excise, tobacco, alcohol or pyrotechnic materials).

The service is offered depending on the available storage capacity and is made available in our own warehouses.

The service and responsibility starts from the reception of the goods in our warehouse and the communication to the customer of the received stock.

The offer is expressed in EUR without VAT (VAT is applied depending on the country of invoicing and the legislation in force) - and is valid for 30 days from the date of transmission.
